Our Vision

Media-Go aims to be the market leader in digital audiovisual industry in the next decade to create a wonderful world, through the advanced technology, providing flexibility and simplification in daily lives communication.

Our Mission

Media-Go stands at the forefront to provide the advanced AV solutions to maximize the effectiveness of communication media. We are customer-focused to help you to be outstanding among your competitors with state-of-the-art AV technology.

Our Values

Commitment to Quality

We comply with ISO-9001 protocol with many proven qualifications such as the Government registered electrical contractor, approved supplier of materials and specialist contractor for public works (Audio & Video Electronics Installation), and CIC registered subcontractor. These qualifications ensure our high standards in quality and performance.

Customization

Our team is dedicated to provide customers with customized designs for all scenarios and applications. Customers will be benefited from the flexibility and convenience of the systems we offered.

Professionalism

We possess highly-trained and experienced professionals to offer the most efficient, reliable and user-friendly audiovisual solutions. Regular trainings are given to all our experts to drives us to overcome the challenges of today and tomorrow with outstanding performance.

Sustainability

Certified by ISO-14001, we commit to manage project execution while minimizing the environmental footprints. We would develop our business in line with sustainability.

Compliance with Code of Ethics

We persist with a high standard of integrity and work in accordance with our code of ethics. We value goodwill and promise to accomplish our duties in an ethical way.

Companies

Media-Go Engineering Ltd.

Established in 1988, Media-Go Engineering Ltd. specializes in providing diverse advanced, reliable, and customized audiovisual solutions. Our wide scope of solutions include: Collaboration Solutions, AV Integration Solutions, Central Control Solutions, Digital Media Solutions, and Innovative Technology Solutions. We offer professional one-stop services that cover from technology consultation, systems design and programming, software and hardware development, systems installation, system integration, training, to maintenance and support.

Media-Go Technology Ltd.

Media-Go Technology Ltd. is one of the top systems distributors of a full spectrum of advanced and high-quality audiovisual products with professional and trustworthy services to a wide range of customers like System Integrators, Dealers, SMEs and End-Users. As a leader of innovative audiovisual technology, Media-Go manages a comprehensive and robust network of dealers and suppliers in Hong Kong, China and throughout Asia.

Media-Go iArchitech Solutions Ltd.

Media-Go iArchitech Solutions Ltd. (MGiA) combines IT solutions with audiovisual systems to provide superior and state-of-the-art one-stop AV solutions for our customers in Macau. MGiA made remarkable contributions to Macau's projects over the years, and we would keep offering the best-quality systems to customers.

Our Services

System Programming

Once the customized system design is ready, we will start programming and go through numerous testing to ensure smooth system operation.

Distribution

We are a reliable representative of many well-known manufacturers and suppliers around the world.

System Integration

We provide one-stop integration service of different systems. With everything integrated, centralized control brings much convenience and flexibility to the users.

Technology Consultation

Our well-experienced team always keeps abreast of the latest AV technologies and is capable of providing customers with professional solutions and advices.

System Design

We are considerate to listen to customers' needs and requirements to design a customized solution for them.

Software & Hardware Development

We have a professional team that is capable of developing software and hardware in compliance with customers' needs and requirements. We offer system upgrade to help customers to keep up with the ongoing technology advancement.

Managed Services

Our professional team is always ready for providing customers with timely support and operation at their places. We aim to assist and provide guidance to customers in the most efficient way.

Training

We offer professional trainings to customers after the completion of a project. It ensures our customers to be totally educated and familiar with the system operation and functionalities.

Maintenance & Support

We care about after-sales services by offering all-round maintenance and support services. The around-the-clock maintenance service minimizes the loss by system downtime.

Our Solutions

Collaboration Solutions

BYOD (Bring Your Own Device) Solution

Using your own smart device to wirelessly share media with the others in the same network, we offer BYOD Solution that facilitates quick and wireless sharing of information and ideas in the business or education world.

Audio Conferencing Solution

Communications matter to all corporates that collaboration with clear conferencing may directly influence the work efficiency and accuracy. We provide reliable Audio Conferencing Solution that enables smooth verbal communications among people in different locations.

Microsoft Skype for Business

We offer Microsoft Skype for Business which features one-to-many participants, real-time video conferencing with non-Skype users, powerful productivity and integration with Microsoft Office, business-level security, and more. Collaboration can be done more smoothly with the use of Skype for Business.

Microsoft Surface Hub

We offer Microsoft Surface Hub, a HD touch display that integrates seamlessly into the modern workplace, enhancing productivity in any space where people gather to brainstorm ideas, discuss and share document on the same page.

Video Conferencing Solution

We offer a wide range of corporate solutions for fulfilling customers' collaboration and conferencing needs including features such as highly-compatible conferencing systems and one-button dialing. With easy-to-use functions, communication and collaboration become easier and more efficient regardless of geographic locations.

Interactive Collaboration Solution

We serve customers by Interactive Collaboration Solution which covers touch panels, touch interactive whiteboard and wireless presentation systems, allowing easy and fast annotation and improving 2-way communications. Interactive collaboration makes operation more efficient and convenient.

Virtual Meeting Rooms Solution

Virtual Meeting Room is the revolution of conventional meeting room that gathers people to have discussion regardless of their physical locations and devices used. We offer highly-compatible video conferencing solution that allows collaboration by using different devices at anytime and anywhere.

AV Integration Solutions

Professional Audio Solution

We offer Professional Audio Products that can be customized with optimum audio experience and tailored for any environment. Our professional system integration solution makes seamless integration of audio system with any other AV systems possible.

Boardroom Solution

A boardroom with state-of-the-art AV systems equipped not only demonstrates the corporate culture in a hi-tech way, but also enhances productivity and working efficiency by seamless collaboration with the others. AV systems, video conferencing system, room control system, voting system, etc., we can incorporate any systems in the boardroom.

Public Address Solution

We offer high-quality, cost-effective, and reliable Public Address Systems in any commercial environment or even the most demanding applications, including congress centres, conference venues, and theatres. With our system integration service, PA system incorporates numerous advanced functionalities for broadcasting messages and music.

Conference Room Solution

With cutting-edge systems such as advanced video/audio conferencing system, wireless presentation system, interactive whiteboard, and more systems provided by us, we can accommodate any demands and functions required for building up a fully functional conference room for customers.

Simultaneous Interpretation and Voting Solution

Featuring easy operation, convenience, elimination of cross-frequencies and background noise, Simultaneous Interpretation and Voting System we offered is applicable to a wide range of applications, from small-scale multilingual meetings to large-scale international conferences.

Training Room Solution

We endeavor to help customers make a breakthrough in typical training by delivering up-to-the-minute AV solution including interactive touch panel and whiteboard, wireless collaboration system, high-quality projection, classroom recording system, and more. Audiences are able to learn with added fun and value via the aid of different AV systems.

Audio / Video Distribution Management Solution

Regardless of your multimedia source, we have solutions for all manners of distribution and a wide scope of medium for consumer, industrial and commercial applications in all shapes, sizes and budgets. Ranging from Category 5/6, fiber cabling infrastructure to IP distribution technology, we are able to distribute live TV or any information in real-time.

Theatre Hall Solution

We are capable of overcoming all possible problems for setting up a grand theatre hall with diversified multimedia systems deployed. Our proven expertise in integrating audio/video distribution, AV systems integration, professional audio system, central control system, and more, can fulfill any demands from customers with steady performance.

Central Control Solutions

Hotel Guestroom Automation Solution

Hotel Guestroom Automation Solution streamlines and incorporates all the technology in the room, achieving ultimate convenience and comfort at a fingertip. By integrating in-room systems such as drapes, lights, temperature, and audio/video components, guests can control all systems by a centralized panel.

Home Automation Solution

To pursue optimized convenience and remote control, we offer Home Automation Solution for integrating and centrally controlling home systems such as lights, thermostats, drapes, media systems. Users are able to manage the systems wirelessly via smart devices, allowing them to preset desired home environment before arriving home.

Room Control Solution

Intelligent and convenient, we offer Room Control Solution to integrate control over multiple systems including HVAC, intelligent lighting & dimming control, thermostat, shades & drapes control and scenes control in any commercial environment, such as meeting room. Everything can be controlled remotely via smart devices or panels.

Show Control Solution

We are professional in providing Show Control Solution which incorporates audio, video, drapes, thermostats, AV equipment and lightings to create a desired atmosphere for museums, theaters, casinos, stadiums, arenas and convention centres. We are also able to create fully interactive exhibits, to distribute live or produced content, and to manage resources centrally or remotely on the network.

Room Booking Solution

A Room Booking System is an essential tool in corporate environment for raising productivity by centralized room scheduling. We provide one-stop room booking solution which adopts the latest programming technology with instant room status preview and booking, eliminating conflicts of overlapped bookings and ensuring efficient use of rooms.

Digital Media Solutions

Video Wall Solution

Keeping up with the rapid development in video wall technology, we provide a wide variety of video walls in various scales and configurations that feature different display quality and adopted technologies. We can provide customers with a wide range of solutions for different applications.

Digital Signage Solution

Enjoy totally customized content creation in your Digital Signage with the ability to inlay music, videos, images, texts and RSS feeds by our all-round solution. Digital Signage with centralized content management allows users to display live information and to change it on the go when required. We offer Digital Signage in varied dimensions that can be applied to different scenarios.

LED Display Solution

We are capable of supplying, designing and installing LED Display Systems of any sizes no matter they are for portable or permanent, indoor or outdoor use. We provide high-quality LED Display Systems that display clear, vivid and high-resolution images for capturing everyone's attention.

Streaming Media Solution

Online media provides borderless entertainment to the world, making Streaming Media vital to network users. We offer reliable and stable Streaming Media Solution that allows users to communicate, get entertainment, and receive information over IP network immediately without waiting.

Content Management Solution

We provide customers with easy-to-use and customized Content Management System (CMS) with full functionalities, enabling simple management of the display content including media management, scheduling, layout design, synchronization with social media, etc. Cloud-based CMS allows operators to manage it at anytime and at anywhere with high flexibility.

Innovative Technology Solutions

Our Projects

Education

The University of Hong Kong

Audience Measurement Solution

The powerful Audience Measurement and Analysis Solution compiles valuable data generated from passersby counting. It also analyzes metrics including impressions, opportunity to view, age group, gender, emotions, dwell time, distance, traffic by time, day or location, helping the management to have better future planning and adjust marketing strategies from time to time.

Augmented Reality (AR) Solution

Augmented Reality (AR) is gaining popularity as it brings viewers an animated sensory experience with elements that are augmented or supplemented by computer-generated sensory input such as sound, graphics, video or GPS data. We provide AR Solution to tailor the requests of our customers and help them create impressive virtual products.

Virtual Reality (VR) Solution

Virtual Reality (VR) is a red-hot computer technology that uses software to create lifelike images, sounds and other sensations that replicate a real environment, and to simulate physical presence of the viewer in the environment. We can help customers to initiate VR projects with comprehensive support from conception to completion.
